Data layer
get_dataset(name)
PyG, OGB, DGL sources
Custom graph input
Transductive / inductive
compat: PyG ↔ DGL
graph
Reduction layer
create_reducer(method)
Sparsification
5 node / 7 edge
12 methods
Coarsening
10 methods
Condensation
16 methods
init
HPO / validation-only
reduced graph
Evaluation layer
Evaluator
7 GNN backbones / transfer
Architecture search / rankings
Graph properties
Privacy / robustness
Runtime / memory
